

Simon Marais Mathematics Competition Rules

9 April 2018

1. Definitions

- 1.1. "Rules" refers to this "Simon Marais Mathematics Competition Rules" document only, except if explicitly indicated otherwise.
- 1.2. "Competition" refers to the Simon Marais Mathematics Competition.
- 1.3. "Organisers" refers to the Organising Committee of the Competition, as constituted by the Board of Simon Marais Mathematics Competition Limited.
- 1.4. "Universities" are defined in 2.1.1.
- 1.5. "Eligible Grouping" is defined in 5.5.

2. Eligibility

2.1. Institutional Eligibility:

- 2.1.1. Institutions that are recognised as tertiary education institutions in their home country, and accepted as such by the Organisers, will qualify as "Universities" for the purposes of the Competition.
- 2.1.2. Universities that are between the time zones UTC + 5.30 and UTC + 13.00 (inclusive) on the date of the competition can submit an application to the Organisers for their students to participate. Countries satisfying that condition span time zones from India in the west to New Zealand in the east.
- 2.1.3. The Organisers will only accept the application if, among other criteria, the University undertakes to abide by the Rules and to enforce those Rules when administering the Competition.

2.2. **Individual Eligibility:** A person who, at the Competition date, is enrolled in a course of study at a University that has been accepted into the Competition, can participate in the Competition, provided:

- 2.2.1. S/he has not participated more than three times previously (through any University).
- 2.2.2. At the Competition date, s/he has been a tertiary student in a relevant discipline for less than four full time equivalent years.
- 2.2.3. High School students may only apply (individually or as part of a pair) if at the Competition date they are enrolled in a

course of study at the University and furthermore satisfy 2.2.1 and 2.2.2.

3. Registration

3.1. University application

3.1.1. Universities have to complete and submit a University Application Form (found at <http://www.simonmarais.org>) to the Organisers by the date determined by the Organisers and published on the website.

3.1.2. The Organisers will inform each University whether their application has been accepted by the date determined by the Organisers and published on the website.

3.1.3. Each University must nominate one responsible person (the "local coordinator"), who has to be a full-time faculty member.

3.1.4. The local coordinator will be responsible for the individual registration process and for the administration of the exam at the University.

3.1.5. If possible, any assistants the local coordinator wishes to use must be named to the Organising Committee prior to the examination. The local coordinator will assume full responsibility for all assistants' conduct.

3.1.6. The local coordinator will, along with the University and as part of the University application, undertake to abide by the Rules.

3.1.7. Local coordinators at nearby Universities may decide to collaborate in hosting the exam at just one University for the collaborating Universities.

3.2. Individual and Pairs registration

3.2.1. Students at a registered University who wish to participate must register themselves with the designated local coordinator at their University, so that a list of participants is received by the Organisers by the date determined by the Organisers and published on the website.

3.2.2. The student has to demonstrate to the satisfaction of the University and the Organisers that s/he satisfies the Individual Eligibility conditions under 2.2.

3.2.3. The student has to indicate whether s/he will be participating individually or as member of a pair; in the latter case the other member of the pair has to be accepted for

registration by the University and Organisers as well, and also state that s/he will be a member of that pair. The two members of a pair must be students at the same University.

3.2.4. At the time of registration, the student has to certify, using the *pro forma* registration form, that they will

3.2.4.1. adhere to the rules of the Competition and in particular

3.2.4.2. not communicate exam questions or solutions to anyone except their partner (if they are part of a pair) before the end of each exam, or to anyone outside their exam centre before the end of the second exam.

3.2.5. Universities will keep a record of the identifying information and any other information gathered with respect to 2.2.1 - 2.2.3, but the local coordinator will only forward full name, date of birth, self-identified gender, individual/pair status and email address (if provided by the student) to the Organisers.

3.2.6. Local coordinators should ensure that the complete and verified information from 3.2.5 reaches the Organisers by the date determined by the Organisers and published on the website, otherwise none of the students from that University will be considered officially entered.

4. Exam

4.1. The Organisers will determine the date of the examination annually and make it public before entries are invited.

4.2. Organisers reserve the right to attend and observe the administration of the exam at any exam centre unannounced.

4.3. The examination shall consist of two periods of exactly three hours each (including reading time), with a 90-minute break between the two sessions.

4.4. The first examination will be a three-hour closed book exam. The second examination will also be a three-hour closed book exam, possibly including one open problem, which will be identified as such.

4.5. The examination papers will only be available to the local coordinator for downloading 60 minutes before the start of the examination. Each local coordinator will be responsible for downloading, printing and distributing the papers by the official starting time, and keeping the contents of the exam confidential before the starting time. The Organisers will not be responsible for any local difficulties in downloading/copying/distributing

examination papers.

4.6. Exams will commence in a staggered fashion across time zones, with the intent that no session commences anywhere after that equivalent session has already ended in another time zone (the only exception is listed in 4.7). As an example, the first exam in New Zealand might commence at 11.30am local time and end at 2.30pm, with the second exam commencing at 4.00pm and ending at 7.00pm. The first exam in India would commence at 7.00am local time and end at 10.00am, with the second exam commencing at 11.30pm and ending at 2.30pm. Final exam times will be published on the website in accordance with the schedule also available on the website.

4.7. Students who, for religious reasons, cannot take the examination during the scheduled hours may take the examination starting at sundown on the scheduled Saturday, upon request by the local coordinator and with the approval of the Organisers. Such students must remain under the supervision of a faculty member or relevant religious office holder from the official starting time for that time zone on the day of the examination. Apart from the usual exam conditions, they must not have in their possession any device that can receive electronic communication at any time from the official starting time for that time zone until the end of their own agreed second exam period. The supervising faculty member or relevant religious office holder will assume responsibility for ensuring that the students do not receive outside information about the exam by any other means.

4.8. The local coordinator will conduct the Competition exam under stringent University examination conditions and ensure that there is no collaboration or outside assistance of any kind. The only exception to the non-collaboration rule is within each pair.

4.9. The Organisers will provide local coordinators with contact details to which to refer any student requests for mathematical clarifications or explanations regarding Competition problems during the exam. Local coordinators, and any other persons who assist in supervising the exam, may not provide students with any clarifications or explanations of the Competition problems, except with the explicit consent of the Organisers via this designated contact.

4.10. Local coordinators should ensure enough space is allocated that individuals will be undisturbed by pairs, and that pairs can cooperate in a low voice without being overheard. In many cases that will mean separate rooms for individuals and pairs, with the density in the pairs room much lower than usual exam conditions. It will very likely imply the need for assistants to the local coordinators (see 3.1.5).

4.11. Students should hand in any devices capable of communication, computation or memory prior to the start of the examination. These include, but are not limited to, phones, calculators, laptops, tablets and smartwatches. These devices have to be retained by the local coordinator until the end of the second exam sitting. (At the discretion of the local organiser, these may be briefly returned during the break if needed, e.g. if someone needs to make an urgent phone call).

4.12. Students will not be allowed to leave the exam location before the end of each exam. In cases where it is unavoidable (e.g. apparent medical emergency), the local coordinator will note the name of the student leaving and the time they leave. (This excludes toilet breaks, which can be taken as usual under University examination conditions).

4.13. At the conclusion of the examination, the local coordinator is responsible for collecting the papers and mailing or couriering them to an address to be supplied. It is the responsibility of the local coordinator to ensure that the examination scripts are sent expeditiously and securely. Papers postmarked more than four business days after the Competition will not be accepted. The Organisers may also notify the local coordinators of a cut-off date for receipt of papers. Local coordinators are responsible for all costs incurred in sending examination scripts.

4.14. Students are able to submit complaints regarding the conduct of the examination to their local coordinator (within a week of the examination) or direct to the Organisers (within two weeks of the examination).

5. Scoring

5.1. Grading and scoring decisions are final and no correspondence will be entered into.

5.2. Each problem is graded on a scale from 0 to 7, with the possible exception of the open problem, which is intended to separate the top students.

5.3. Scores will be computed for each participating individual and each pair and will be the sum of scores for the solutions submitted to each problem by that individual or pair.

5.4. Multiple solutions or attempted solutions to problems may be submitted and will be considered by markers.

5.5. A representative University score will be calculated for a University only if that University has at least one Eligible Grouping amongst all its students that participated in the exam. An Eligible Grouping consists of 3 individuals and 2 pairs, subject to at least 3

out of the 7 students being female, and at least 3 being male. An Eligible Grouping score will be the sum of five scores: one for each individual and each pair. The University score will be the maximum over all possible Eligible Groupings for that University.

5.6. A University can enter individuals and pairs even if in aggregate it has not entered an Eligible Grouping.

6. Results

6.1. The Organisers reserve the right to perform statistical analysis on results by location, as well as relying on other reasonable means to identify suspected irregularities.

6.2. In case of suspected irregularities, the Organisers will have the right to withhold individual, pair and/or University scores from the overall results pool until the matter is resolved.

6.3. Where the Organisers are satisfied that an individual, pair or University has broken one of the Rules, they retain the right to disqualify the individual, pair or University. If a University is disqualified, all individual and pair entries from that University are automatically disqualified.

6.4. Where a person has previously been disqualified whether entered as an individual or in a pair, or where a University has previously been disqualified, the Organisers reserve the right to refuse registration for future Competitions by that person or University.

6.5. The names and Universities of the top quartile individual contestants, the top quartile pairs, the top quartile Universities, as well as the top individual, pair and University in each country will be posted on the website as soon as possible. In cases where the student did not consent to the use of her/his name, an entry of "Anonymous" will be displayed alongside the University name.

6.6. Further summary information that does not identify particular individuals or Universities may be posted on the website.

6.7. A report giving ranking information regarding individuals and pairs at a participating University and (if the University has at least one Eligible Grouping) the University ranking will be communicated to the local coordinator of the examination at the University. Contestants may obtain information related to their own rank only from their local coordinator.

6.8. Local coordinators will be encouraged to submit the listing outlined in 6.5 to applicable professional mathematics publications, e.g. in the case of Australia to the Gazette of the Australian Mathematical Society.

6.9. Problems and solutions will be published on the website in due course.

7. Prizes

7.1. The prize pool comprises A\$100,500 in total, with additional corporate prizes and internship opportunities available to some entrants.

7.2. Individual prizes are

7.2.1. First: A\$5,000

7.2.2. Second: A\$3,500

7.2.3. Third: A\$1,500

7.2.4. Fourth to Tenth: A\$1,000 each

7.3. Pairs prizes are

7.3.1. First: A\$10,000

7.3.2. Second: A\$7,000

7.3.3. Third: A\$3,000

7.3.4. Fourth to Tenth: A\$2,000 each

7.4. University prizes are

7.4.1. First: A\$20,000

7.4.2. Second: A\$15,000

7.4.3. Third: A\$10,000

7.5. Australia-wide prizes

7.5.1. Best individual entry: A\$1,500

7.5.2. Best pairs entry: A\$3,000

7.6. In the event of a draw in a category, the Organising Committee will determine awards at their absolute discretion. In general, the awards will be based on three principles:

7.6.1. total prize money in that category will remain unchanged.

7.6.2. competitors with the same score will be awarded the same place and the same amount of prize money.

7.6.3. no competitor will receive a larger amount of prize money than any higher-placed competitor in the same category.

8. Miscellaneous

8.1. The Organisers may, without notice, amend the Rules at any time by posting an amended version at www.simonmarais.org.

8.2. Simon Marais Mathematics Competition Limited retains all rights to the exam questions, answers and responses. Without limitation, this material cannot be reproduced for commercial gain.

8.3. Unless otherwise specified, all exam papers will be set in English, and all submitted responses must be in English.
